CAMERA ASSISTANT & ENGINEERING

Bristol-Based

With a strong work ethic honed over 5 years working professionally in television, I've developed a versatile skill set, crucial for supporting productions in a technical capacity both in the office and on location. My interests mostly lie in technical camerawork and engineering. I love developing and building new technology and pushing the boundaries of what's possible. I've built several new technologies for leading high-profile platforms and have proven myself highly capable in areas including CAD, PCB design, 3D printing, CNC & coding. I'm an experienced camera assistant and have worked several international shoots in varying environments. I'm driven by the challenges inherent in documentary filmmaking, and find satisfaction in problem-solving and innovating to resolve them in a pragmatic way.
